

# 4 Qualities To Look For In A Moving Company

## 1 Proper Equipment

Be sure the moving company has the proper equipment to accommodate your move. The equipment needs to be up to date and have the capabilities of transporting any item - big or small.

## 2 Competitive Pricing

Don't allow a bogus sales guy to try and upcharge you for every miniscule detail. A quality moving company will cater their prices based on your individual needs.

## 3 Happy Movers

On a typical day, you would not trust a group of poorly dressed and ill-mannered individuals to enter your home. So don't trust them to move your belongings as well. Look for clean cut and friendly staff to assist you in your move.

## 4 Recommendations

If you are choosing an unheard of company because they are cheap - you will get what you pay for - along with a broken lamp, bed frame and your great grandmother's china collection.

Look for companies with high ratings on credible sites.
